

VZHŮRU NOHAMA

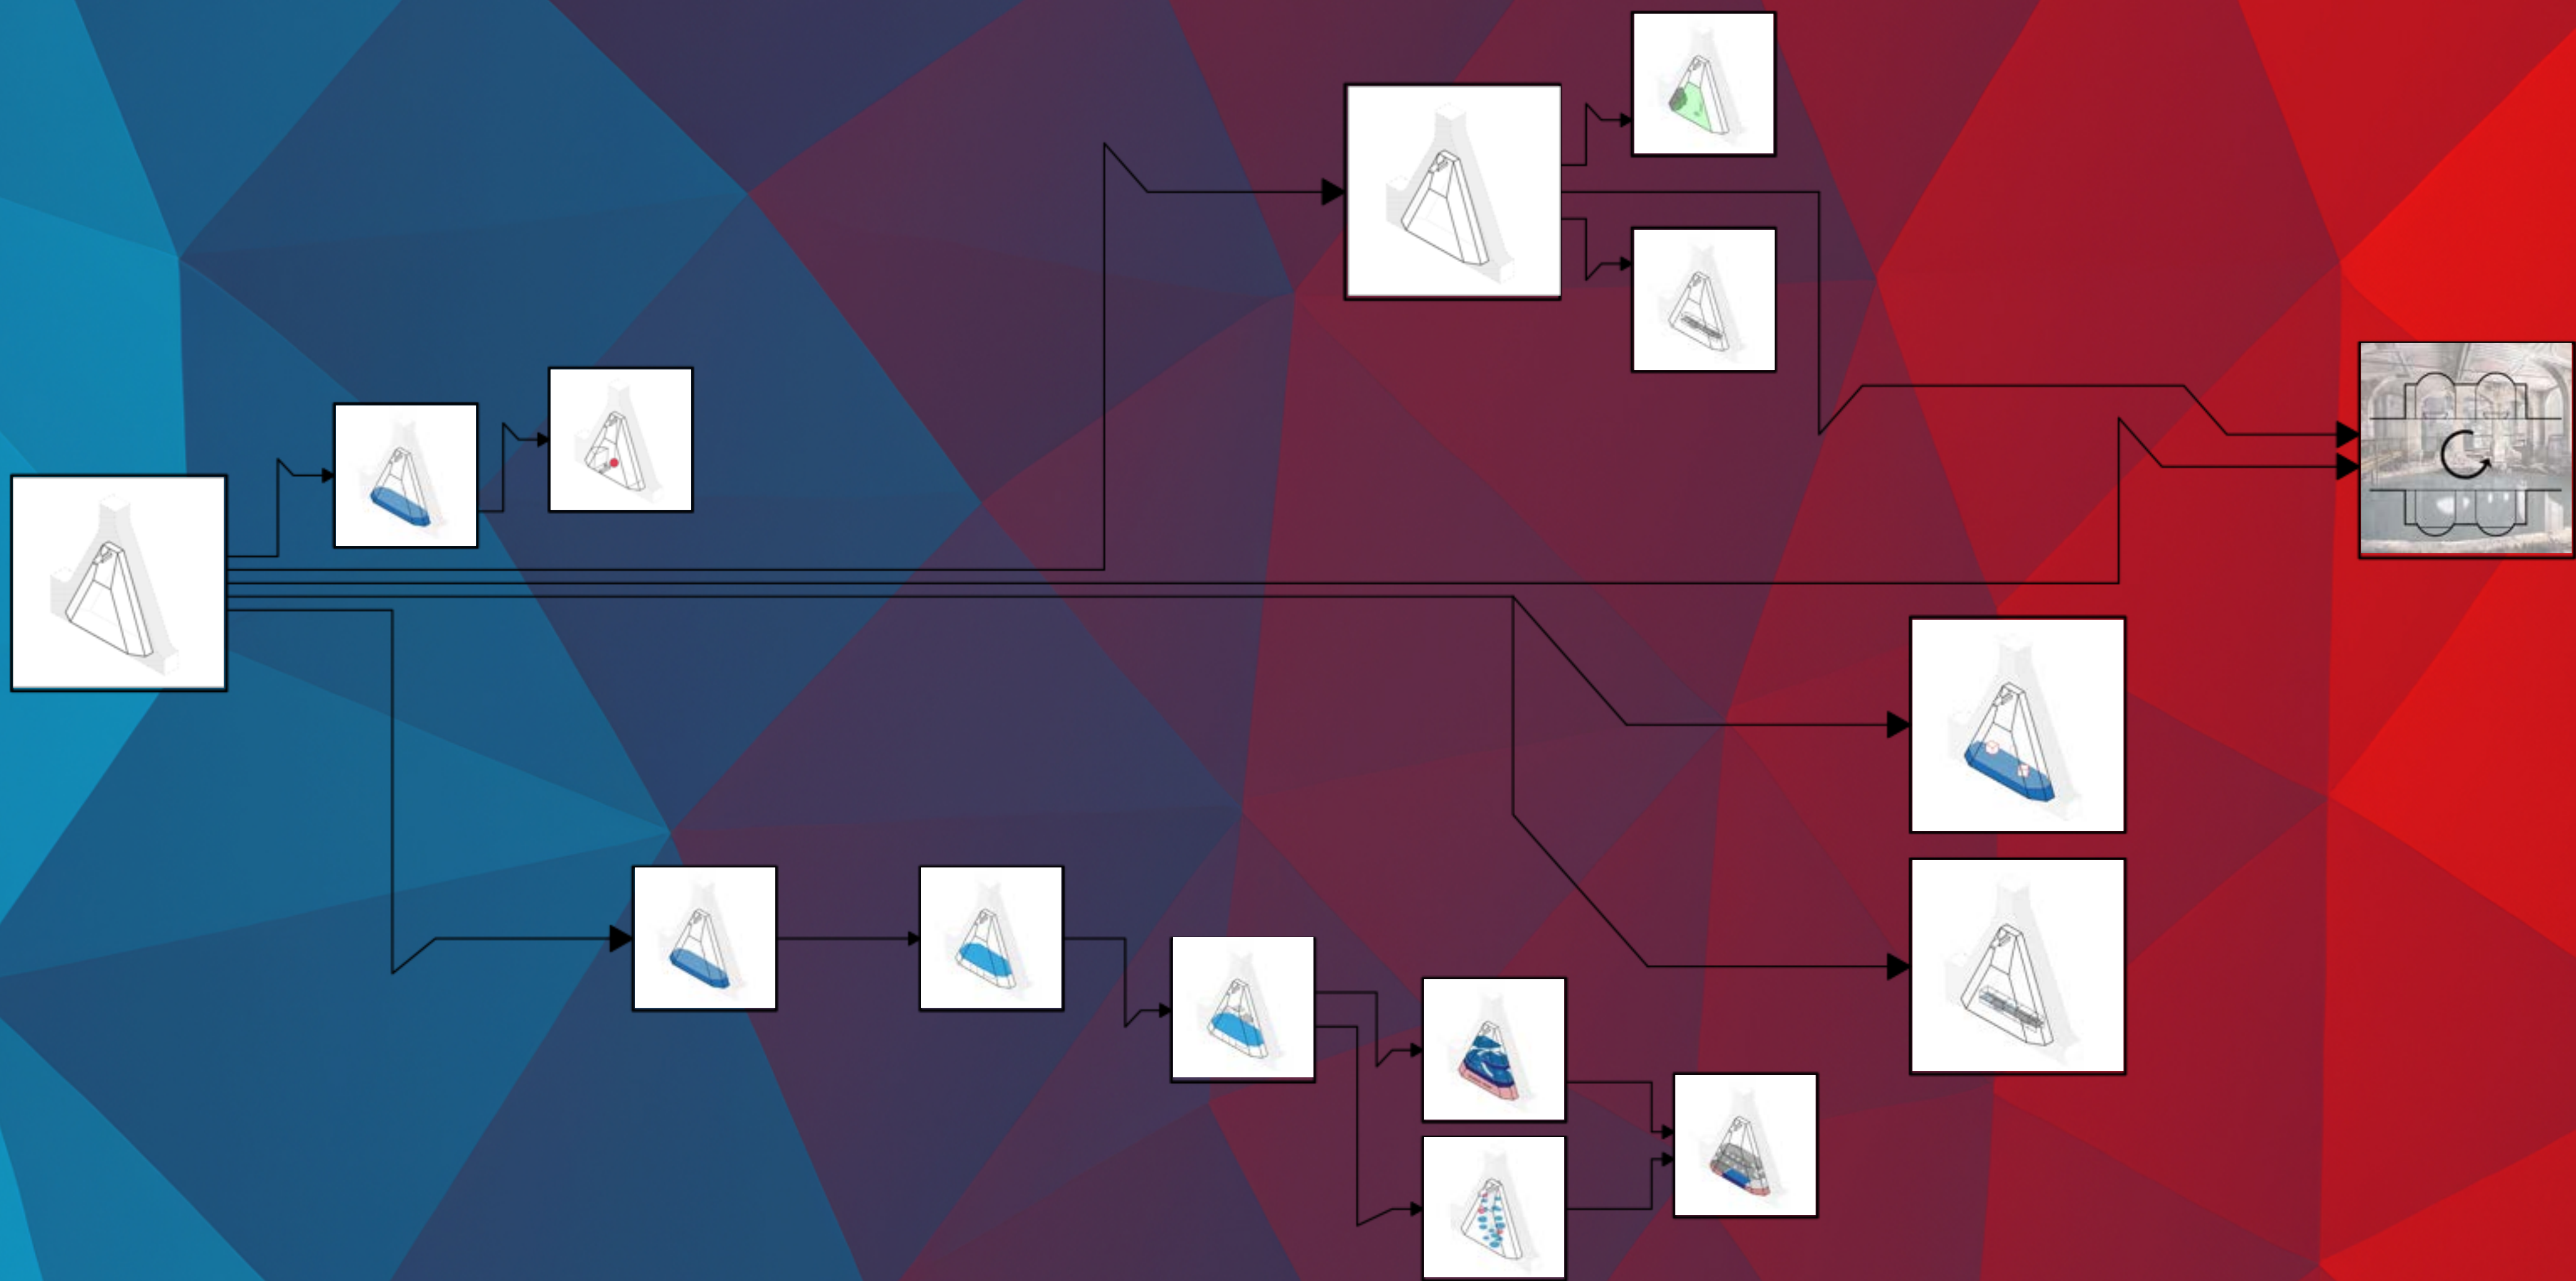

MAROŠ ORAVKIN - ATSS

VIKTORIA VÍATCHÍNA - ATVZ

Naše práce „Lázně vzhůru nohama“ je zaměřena na inovativní koncept lázní, který vychází z několika předesešlých návrhů. Tato práce se snaží přinést nový pohled na lázeňskou koncepci, která překračuje tradiční hranice. Vedle prezentace našeho vlastního návrhu se rozhodneme také představit několik předchozích nápadů, které nás inspirovaly. Klíčovou otázkou v této fázi projektu zůstává, zda je koncept lázní v přehradě skutečně perspektivní a zda přináší měřitelné benefity pro návštěvníky. Je tato netradiční myšlenka lázeňského centra v takovém prostředí skutečně dobrým nápadem, či pouhým experimentem?
