

Ing. arch. MAROŠ ORAVKIN

EDUCATION

FA CTU, Prague | 2020-2026
Bachelor's and Master's degree

Università Mediterranea, Reggio Calabria | 2024
Erasmus+ study

WORK EXPERIENCE

Trigema Holding – Black ´n Arch s.r.o. | 2024-2025
Junior Architect

I collaborated on the design and coordination of large development projects, where I dealt with layout modifications, the design of common areas, and the creation of project documentation. I independently prepared and submitted complete documentation of the actual construction (DSPS). At the same time, I worked closely on preparing documents for the authorities, gaining valuable insight into the processes and management of large development projects.

Metrostav DIZ | 2022
Engineer

I participated in the technically and historically extremely demanding reconstruction of the Industrial Palace in Prague. I was responsible for the precise surveying of existing structures, fillings of openings and atypical wooden and metal elements directly on the construction site. I then transformed the measured data from the field into detailed drawing documentation necessary for further implementation phases.

EPIC Prague | 2021-present
Bartender

Working in the extremely dynamic environment of a large Prague club taught me perfect time management and stress resistance. I learned how to quickly and effectively resolve crisis situations under pressure, and I communicated intensively with people on a daily basis.

SKILLS

BIM & CAD:	Revit Advanced AutoCAD Advanced Archicad Intermediate
Visualizations:	Lumion Very Advanced Blender Intermediate
Graphics:	Adobe InDesign Advanced Photoshop Advanced Illustrator Basic
Other:	Driving License Category B Active driver

ABOUT ME

Architecture graduate from CTU with practical experience from a developer and the execution of complex construction projects. I have excellent command of the BIM-Revit environment at the detail design stage (DPS) level. I can handle detailed and independent design work, including complete documentation processing, as well as the coordination of professions. I am currently looking for an opportunity anywhere I can combine my architectural background with technical and process precision.
