EDUCATION

42Prague (core student, March 2024 - present, Prague, CZ)

- international peer-to-peer, project-based coding school. Core studies include C, C++, networking & infrastructure projects.

IU International University of Applied Sciences (BSc Software Engineering, 2024-2026, Berlin, DE)

- fully remote program with focus on modern technologies and methodologies and software development lifecycle practices

CTU Faculty of Civil Engineering (pursued Bc. Architecture, 2019-2021, Prague, CZ)

- strong focus on mathematics, structural analysis, technical drawing, CAD software
- left Architecture after 2 years after reassessing professional goals

J.G.Tajovský Grammar School (2015-2019, Banská Bystrica, SK)

- graduated with distinction (mathematics, descriptive geometry, English, Slovak)

SKILLS

programming & scripting languages: C (memory management, algorithms & DS, concurrency & parallelism, inter-process communication, graphical programming, system calls), JavaScript, Bash, SQL

web development: React, Axios, Node.js + Express, user-oriented design thinking, APIs

cloud (beginner): AWS (EC2, S3, ALB, AutoScaling, Cloudfront), Terraform

DevOps (beginner): Docker, containerization, Jenkins, CI/CD, Linux / Ubuntu, scripting

tools & methodologies: git, agile, scrum, jira

PROJECTS

GreenHack 2025: ČEPS Prize Winner <https://zuzanapiarova.github.io/#/projects/greenhack>

- web-based tool for visualizing and planning geodata-based transmission routes
- planned and developed within 36 hours in team of 2
- I worked on React frontend, frontend-backend communication using axios and flask, fetching geodata from APIs(ARCGIS), rendering data and map components with Leaflet.js

MiniRT: A simple raytracer in C <https://zuzanapiarova.github.io/#/projects/minirt>

- ray tracer in C to render scenes with simple objects, dynamic camera movement, object resizing
- implementing vector math, parametric description of 3D objects, transformation matrices

Deployment of a website to AWS <https://zuzanapiarova.github.io/#/projects/cloud-programming>

- university project to deploy simple frontend & backend website to AWS
- EC2 with Docker for backend, S3 for static frontend files, ALB for load balancing and auto scaling, Cloudfront for reverse proxy & caching at edge locations

Minishell: Own little Bash <https://zuzanapiarova.github.io/#/projects/minishell>

- replicating bash - parsing, pipes, expanding environment variables, forking processes, file redirection, command-line utilities, shell built-ins, executing programs by relative/absolute path

Designing a CI/CD Pipeline <https://zuzanapiarova.github.io/#/projects/devops>

WORK EXPERIENCE

Scott.Weber (Community Representative, 2023-2024, Prague, CZ)

- ensured daily operations of the Churchill location, actively engaged with community, resolved client requests, coordinated events, administrative tasks, managed legal & financial documents

Inditex (Sales Representative, 2021-2023, Eindhoven, NL; Prague, CZ)

- daily sales operations and customer service, stockroom responsible person, store opening and closing responsibility, cash register reconciliation, processing incoming inventory shipments
